High Flow Drum Pump
Aluminum Model

DESCRIPTION
This High Flow Hand-Crank Drum Pump is self-priming. It is used for dispersing and transferring lubricating oil, antifreeze (ethylene-glycol), fuel oil, gasoline and other noncorrosive, non-abrasive liquids compatible with pump component materials*.

(*) Always refer to a chemical resistance chart to confirm compatibility. Not rated for food products.

UNPACKING
Inspect carefully for any damage that may have occurred during transit. Check for loose, missing or damaged parts. Transit damage claims should be made to the shipping company.

SPECIFICATIONS
Flow.................................................................27 GPM at 120 RPM
Max. Liquid Temperature........................................160º F (71º C)
Mounting.................................................................2” Bung Adapter
Inlet...........................................................................1” NPT
Outlet...........................................................................1” NPT
Spout...........................................................................Plated Steel
Pump Housing.........................................................Cast Aluminum
Rotors...........................................................................Steel
Fasteners (non-wetted)..............................................Plated Steel
Seals...........................................................................Nitrile (Buna-N)
Suction Strainer......................................................#60 Mesh
Weight ..........................................................................11.3 lbs.

GENERAL SAFETY INFORMATION

⚠️ WARNING
It is the responsibility of the user to operate the pump in conformance with OSHA rules for dispensing liquids. Pump containers should be grounded when using with flammable liquids to avoid static electricity. Pump should be washed out before usage since processing lubricants could contaminate the fluid.

1. When using a hand pump (especially when pumping flammable, combustible, or hazardous liquids) follow all electrical and safety codes, as well as the United States Occupational Safety and Health Act (OSHA), most recent National Fire Protection Association, Inc. † (NFPA) Code 30 (Flammable and Combustible Code), NFPA 56A (Standard for use of Inhalation Anesthetics), NFPA 77 (Static Electricity), NFPA 78 (Lighting Protection Code), NFPA 80 (Standard Method of Fire Test of Building Construction), NFPA 704 (Identification of the Fire Hazards of Material(s), other NFPA codes, local codes and ordinances), as needed in a particular application.

2. Know the pump application, limitations and potential hazards. The WARNING statements indicate potentially hazardous conditions for the operator or equipment. TAKE NECESSARY STEPS TO PROTECT PERSONNEL AND EQUIPMENT. Pump should only be used with liquids compatible with pump component materials. Consult PUMP CHEMICAL COMPATIBILITY CHART and PUMP SPECIFICATIONS. Also, the chemical supplier should be consulted regarding any questions of chemical compatibility, proper and safe use and handling of chemical. Misapplication of pump or use of non-compatible liquids will void warranty.

⚠️ WARNING
In order to properly use this product familiarize yourself with this pump and also with the liquid (chemical, etc.) that is going to be pumped through the unit. Although this pump is suitable for many liquids, it is not suitable for all liquids!

3. Pumping hazardous, flammable or combustible liquids should only be done in buildings, rooms or areas suited for this purpose (See NFPA 30, NFPA 78, NFPA 80, NFPA 251, NFPA 704, other suitable NFPA codes, OSHA, insurance companies, local codes and ordinances).

⚠️ WARNING
When filling cans, drums, etc. with combustible or flammable liquids, both container pumping from and container pumping to, should be bonded and grounded to dissipate possible accumulations of static electricity and minimize sparks caused by static electricity (refer to NFPA 77 for specifics and further details).

Removal of outer garments in work areas where there may be flammable or explosive liquids, which are ignitable with low electrical energy can be fatal and/or cause property damage (refer to NFPA 56A, and NFPA 77 for further details).

4. The WARNING and instructions for gasoline that follow pertain not only to gasoline, but to any flammable, combustible or hazardous fluid.

⚠️ WARNING
Gasoline is a highly flammable fuel. The improper use, handling or storage of gasoline can be dangerous. Prevent accidents by following these safety rules:

- Use gasoline only as fuel, never as a cleaning fluid.
- Use only an approved container to hold or store gasoline. Never store gasoline in familiar containers such as milk or soda pop bottles.
Specifications Information and Repair Parts Manual

High Flow Drum Pump

- Store gasoline in a cool location out of the reach of children. Never store gasoline near heat or an open flame.
- Provide a fire extinguisher nearby when working with gasoline. Be sure extinguisher is in operating condition – check the pressure gauge or indicator. Be familiar with its proper use. Consult local fire department for the correct type of extinguisher for your application. Extinguishers rated ABC by the National Fire Protection Association are approximate for most applications.
- Provide positive shut-off valves on all permanent fuel supplies. Fuel lines must be of steel piping, adequately secured and free from leaks.
- Provide adequate ventilation and clean up any spills when handling or pumping flammable liquids.
- POSITIVELY NO SMOKING!

5. Do not use torches or apply fire or flame to this pump for any reason.
6. Secure the discharge line before starting the pump. An unsecured discharge line will slip possibly causing personal injury and/or property damage.
7. Do not overtighten non-metallic threaded fittings. One full turn past hand tight is usually enough to prevent leakage. Teflon® sealant tape is provided and should be used on all threaded joints, including the spout.
8. Check hoses for weak or worn condition before each use, making certain that all connections are secure.
9. Periodically inspect pump and system components. Perform routine maintenance as required.
10. Drain all liquids from the system before servicing.

WARNING

Any pump used to transfer flammable liquids must be stored in a well ventilated area after use.

PERSONAL SAFETY

1. Wear safety glasses at all times when working with pump.
2. Wear a face shield, proper apparel and suitable respiratory equipment when pumping hazardous chemicals.
3. Keep work area clean, uncluttered and properly lighted. Replace all unused tools and equipment.
4. Keep visitors at a safe distance from the work area.
5. Make workshop child-proof with padlocks, master switches and by removing starter keys.

WARNING

Failure to follow all General Safety Information can result in a fatality, personal injury and/or property damage!

CAUTION

Before using, be sure gear case is filled with oil (see MAINTENANCE section).

ASSEMBLY AND INSTALLATION

1. Screw bung adapter (Ref. No. 20) into drum with threaded end down.
2. Screw spout (Ref. No. 6) into pump housing (Ref. No. 3). Use Teflon® sealant tape provided.
3. Screw filter body (Ref. No. 13) into inlet of pump housing. Use Teflon® sealant tape provided.
4. Screw suction tube into filter body (Ref. No. 14). Use Teflon® sealant tape provided.
5. Insert pump assembly into drum through bung adapter and tighten butterfly screw (Ref. No. 21) by hand. DO NOT use wrench or tool to tighten butterfly screw.

OPERATION

1. Rotate handle (Ref. No. 5) clockwise several times.

CAUTION

Not for water or other liquids that may cause corrosion.

MAINTENANCE

1. Periodically check oil level, ISO viscosity grade 10 spindle oil or an equivalent lubricant of equal or lower viscosity should be added through the oil plug (Ref. No. 9) up to the bottom of the fill hole.
2. Periodically clean the suction strainer (Ref. No. 16) with kerosene or similar solution.
3. In some applications, condensation or water in the pumped liquid will cause accumulation of corrosion, which will cause the pump to stick. Pouring penetrating oil into the pipe opening and cranking several times usually will free the pump.

WARNING

Failure to follow all General Safety Information can result in a fatality, personal injury and/or property damage!

CAUTION

Before using, be sure gear case is filled with oil (see MAINTENANCE section).

## Troubleshooting Chart

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause(s)</th>
<th>Corrective Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pump does not prime</td>
<td>1. Suction line above liquid</td>
<td>1. Ensure that open end of suction line remains completely below surface of liquid.</td>
</tr>
<tr>
<td></td>
<td>2. Pump speed too slow</td>
<td>2. Operate pump handle rapidly until pump primes (up to 30 cycles).</td>
</tr>
<tr>
<td></td>
<td>3. *Unsuitable suction line</td>
<td>3. Pumps are intended for use with suction line supplied. Longer or collapsible suction line may prohibit priming. Use short length rigid line similar in diameter to suction port. (Maximum pump height above liquid 36”).</td>
</tr>
<tr>
<td></td>
<td>4. Clogged suction line and/or filter</td>
<td>4. Clean suction line and/or filter (where applicable).</td>
</tr>
<tr>
<td></td>
<td>5. Suction line air leakage</td>
<td>5. Verify that all suction line connections are sealed tightly. Use Teflon® tape or appropriate sealant, if necessary.</td>
</tr>
<tr>
<td></td>
<td>6. Cover air leakage</td>
<td>6. Inspect pump cover(s) for looseness and damaged or slipped gaskets. Replace damaged gaskets and snug-up cover(s).</td>
</tr>
<tr>
<td></td>
<td>7. Shaft air leakage</td>
<td>7. Verify shaft seal is properly seated and in good condition. Replace seal if worn or damaged.</td>
</tr>
<tr>
<td></td>
<td>8. Housing air leakage</td>
<td>8. Inspect entire pump housing, cover(s) and shaft for cracks. Replace damaged parts.</td>
</tr>
<tr>
<td></td>
<td>10. Damaged/worn pump parts</td>
<td>10. Remove pump cover and inspect for broken pieces. Components should have smooth finish, no large grooves or voids. Replace damaged parts. Piston type pumps may include a poppet valve, which is designed to prevent back-flow. If excessive leakage past valve is found, replace valve (some leakage is normal).</td>
</tr>
</tbody>
</table>

| Handle difficult or impossible to move | 1. Pump has not been used for some time | 1. Remove pump cover and inspect for crystallized, solidified or gummy remains. Clean parts. To prevent future occurrences, flush pump with appropriate solvent after pumping problem liquid. |
|                                       | 2. Damaged/worn pump parts                    | 2. Remove pump cover and inspect internal parts. Components should have smooth finish, no large grooves or voids. Replace damaged parts. |
|                                       | 3. Corroded pump parts                         | 3. Remove pump cover and inspect for corrosion. Clean parts and use pump only for liquids, which are compatible with pump component materials. |
|                                       | 4. †Damaged/worn gear drive parts              | 4. a) Remove oil plug from gear case and verify oil level is correct, top-up, if necessary. See “Maintenance” for proper lubricant.  
|                                         |                                              | b) If pump is still difficult to turn, drain gear oil and inspect oil for contaminants indicating damaged gears. Replace damaged parts. |

| Insufficient flow                  | 1. Clogged, collapsed or undersized filter, suction and/or discharge line | Pumps are intended for use with supplied rigid line and filter (where applicable). Verify line and filter are clean, not pinched closed, and of similar size of port connection |
|                                   | 2. Also see above “Pump does not prime”     | 2. Check and repair, as necessary. |

---

* For pumps supplied without suction/discharge lines, see “Description” for appropriate line.
* (△) Applies only to vane (not lobe or piston) type pumps.
* (†) Applies only to lobe (not vane or piston) type pumps, which use a gear drive unit.

SALES POLICY: AMT products are sold through our established Distributors. We do not sell direct to the consumer or organization not entitled to trade recognition. Therefore, possession of our catalogs and/or price list(s) does not infer an offer to sell.

MINIMUM ORDER: We appreciate your order, however, all orders are subject to a minimum $35.00 net invoice charge (excluding freight). This applies to all pump and parts purchase orders.

PRICES: Prices are subject to change without notice. All orders accepted are subject to prices in effect at time of shipment.

PAYMENT TERMS: Terms, upon establishment of credit, are Net 30 days. Past due accounts may be subject to a service charge of 1.5% per month. Domestic or assignable letter of credit is required for all export trade.

PAST DUE ACCOUNTS: AMT reserves the right to withhold open account shipments on any past due account. Invoices are considered past due after thirty (30) days. In the interest of sound business, all orders are subject to approval of the Credit Department.

SHIPPING INSTRUCTIONS: All shipments will be made F.O.B. the factory. Where instructions for shipment do not appear on the order, the shipment will be made according to our best judgment. Full risk of loss (including transportation delays and losses) shall pass to the customer upon delivery of the products to the carrier at the F.O.B. point. When loss or delay occurs, primary responsibility for tracing rests with the customer. When there is LOSS or APPARENT VISIBLE DAMAGE to a shipment, when tendered for delivery, DO NOT give the carrier a clear receipt. Note such damage on the carrier’s delivery receipt and HAVE THE DRIVER SIGN THE RECEIPT.

PRODUCT REVISIONS: AMT reserves the right to discontinue, change or improve its products or any portions thereof without being obligated to provide such a change or improvement for units sold and/or shipped prior to such a change or improvement.

12 Month Limited Warranty

EXTENT AND DURATION OF LIMITED WARRANTY
Coverage: American Machine & Tool Company (herein “AMT”) or IPT Pumps by Gorman-Rupp (herein “IPT”) or Gorman-Rupp Industries Division of The Gorman-Rupp Company, Patterson, or the Gorman-Rupp Company (herein referred to as “G-R Units”) each individually warrants that its products and parts shall be free from defects in material and workmanship for twelve (12) months from the date of purchase by the original end user when installation is made and maintenance is performed in accordance with G-R Unit’s recommendations. Wear and tear resulting from use and items normally consumed in use are not covered.

EXCEPTIONS
( A ) This Limited Warranty shall not apply to mechanical seals in AMT or IPT pumps and the following products and parts: engines, motors, trade accessories and all other products, components, parts and materials not manufactured by the G-R Units. These items may, however, be covered by the warranties of their respective manufacturers.
( B ) This warranty does not extend to or apply to any unit which has been repaired or altered at any place other than by a G-R Unit, or by persons not expressly approved by a G-R Unit to make repairs or alterations, nor to any unit the serial number, model number or identification of which has been removed, defaced or altered. ( C ) This warranty does not extend to any product manufactured by a G-R Unit, which has been subjected to misuse, neglect, accident, improper installation, or use in violation of instructions furnished by a G-R Unit. ( D ) Pump Kits: This warranty does not extend to any product sold by a G-R Unit unassembled as a Pump Kit. Pump Kits are warranted against defects in material and workmanship for 60 days from the date of shipment from a G-R Unit. Any Pump Kit parts deemed defective by a G-R Unit will be replaced free of charge within 60 days of shipment. Pump Kits are not returnable for credit.

LIMITATIONS
THE G-R UNITS’ SOLE AND EXCLUSIVE WARRANTY WITH RESPECT TO THEIR PRODUCTS AND PARTS IS THIS LIMITED WARRANTY. THIS LIMITED WARRANTY IS IN LIEU OF ALL OTHER EXPRESS AND/OR IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE.

EXCLUSIVE REMEDY AND DAMAGES
The sole and exclusive remedy for breach of this Warranty by a G-R Unit and the entire extent of its liability for such breach or for damages arising from the use of the products and parts covered under this Limited Warranty, shall be as follows:

1. Repair or Replacement: If inspection shows that any G-R Unit product or part covered under this Limited Warranty is defective in materials or workmanship, the G-R Unit shall repair or replace the defective or non-conforming product or part without charge, whichever the G-R Unit chooses. You must have properly maintained and used the product or part claimed to be defective in accordance with the maintenance schedule or manual, which comes with the product. No allowance will be made for labor, installation, removal, transportation or other charges incurred by you in connection with such repair or replacement.
2. To obtain the above remedy:
   A. Immediately notify the G-R Unit upon discovery of the claimed defect in materials or workmanship and provide the serial number or date code of the product and/or part(s) to provide the G-R Unit with the invoice or bill of sale referencing the product by no later than the expiration date of the warranty period.
   B. The G-R Unit will advise whether inspection will be necessary and how whether repair or replacement will be made. If inspection by the G-R Unit is necessary, the pump or defective part must be sent freight pre-paid to the G-R Unit. Return shipment will be F.O.B. the G-R Unit’s plant.
   C. Return Goods Authorization Requirement: No product will be accepted for return or replacement without the prior written authorization of the G-R Unit. Upon such authorization, and in accordance with instructions from the G-R Unit, the product will be returned to the G-R Unit, shipping charges prepaid by the Buyer.
3. Damages: The G-R Unit’s liability for damages for breach of this Limited Warranty shall not exceed the amount of the purchase price of the product or part in respect to which such damages are claimed. IN NO EVENT SHALL THE G-R UNITS BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES FOR BREACH OF THIS LIMITED WARRANTY.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This Limited Warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.
