This line of Gorman-Rupp self-priming centrifugal pumps are coupled to an hazardous duty explosion proof motor. These pumps are designed for use in hazardous environments and/or for handling flammable liquids. 1-1/2" and 2" NPT port sizes available with single or three phase motors. All models are self-priming and are equipped with Viton® seals with carbon and Ni-resist faces capable of handling liquids with temperatures to 160° F. Maximum flow to 128 GPM and maximum operating pressure to 31 PSI.

Exp. Proof Classes: Class 1, Group D, Class 2, Goups E,F,G or FG.
**Standard Features**

- Cast Iron Construction
- Viton® Seals with Carbon and Ni-resist Faces
- 1-1/2" & 2" NPT Port Sizes
- Maximum Operating Pressure to 31 PSI
- Maximum Temperature 160° F
- Maximum Flow 128 GPM
- Maximum Head 72 ft.
- Solids Handling to 3/8" Diameter
- Self-priming to 20 ft.
- Single to Three Phase 3450 RPM Motors
